Dual bachelor's degree in STEM

3+2 Engineering (BS) with Columbia University

Did you know?

International students who graduate with a STEM-classified degree (bachelor's, master's or doctorate) can stay and work, within the STEM field, in the USA for up to 3 years after finishing their degree. This is a 24-month extension to the standard 12 months allowed under the Optional Practical Training (OPT) benefit for F-1 visa holders.

"

In a field like computer science, which is so male-dominated, Simmons promotes a welcoming classroom atmosphere where I don't have to worry about being overshadowed or overlooked because of my gender. There's something so special about learning computer science in a room full of women, who could all see ourselves in our professor.

KAYA CHOU-KUDU
Graduated in 2020 with BS Computer Science
Currently employed as a full-stack software engineer
