**If you're taking the Aerospace, Automotive and Mechanical pathway<sup>†</sup>, you'll also study:**

- Design, Manufacture and Materials
- Fluid Mechanics
- Mathematics for Engineers 2
- Mechanical Stress and Dynamics
- Thermodynamics

**If you're taking the Civil Engineering pathway<sup>†</sup>, you'll also study:**

- Civil Engineering Field Study
- Civil Engineering Technology and Drawing
- Design, Manufacture and Materials
- Engineering Hydrology<sup>†</sup>
- Mechanical Stress and Dynamics
- Surveying and Geographical Information Systems (GIS)<sup>†</sup>

**If you're taking the Electronic Engineering pathway<sup>†</sup>, you'll also study:**

- Digital Electronic Systems
- Electrical and Electronic Engineering Principles 1
- Electrical and Electronic Engineering Principles 2
- Mathematics for Engineers 2
- Programming

****i** Optional integrated online internship**

For selected course options and an extra fee (maximum £1,440), you can take an online internship as an additional final term while at the College in the UK. You will:

- apply and further develop your English language skills in a professional setting

**Students with at least UKVI IELTS 5.5:** you can study a 2.5 or 3-term course that typically includes Enhancement modules to maximise your university preparation:

- Critical Reading, Writing and Reasoning for Higher Education
- Independent and Collaborative Study

**Plus up to 2 of these modules:**

- Digital Applications
- Preparatory Mathematics
- Preparatory Statistics
- UK Society and Culture

**Students with less than UKVI IELTS 5.5:** you will typically take Extended English and Skills modules to improve your English language and academic skills.

**Students with UKVI IELTS 4.5 or 5.0 will typically take:**

- English for Academic Study 3
- Independent and Collaborative Study
- Reading and Writing 3
- Speaking and Listening 3

**Students with UKVI IELTS 4.0 will typically take:**

- English for Academic Study 2 and 3
- Independent and Collaborative Study
- Reading and Writing 2 and 3
- Speaking and Listening 2 and 3
- Study Skills Preparation

**Personal development activities:** during your course, you'll also have activities to build practical, digital and employability skills.

**Learn more about modules:** you'll find module summaries later in this booklet.

**Artificial Intelligence**

You'll gain an understanding of the basic concepts, processes and uses of AI as well as design and implement a variety of learning systems.

**Biology**

Gain an understanding of biological systems and organisms, as well as key laboratory processes.

**Business Law**

Learn about the legal principles that affect modern businesses, including contract law and company law.

**Chemistry**

Gain an understanding of chemical reactions, fundamental particles and the periodic table.

**Civil Engineering Field Study**

Learn about Civil Engineering methodologies and gain field skills, as well as the ability to analyse place-specific information.

**Civil Engineering Technology and Drawing**

Explore key elements of Civil Engineering technology and systems, and develop your skills in sketching and in drawing.

**Computer Architecture**

You'll gain an understanding of the properties, functions and operations of a simple processing unit and its related digital logic sub-systems.

**Contemporary Global Issues**

Providing you with an introductory overview of key 21st century global issues and events and encourage you to critically evaluate their impact.

**Creative Practice and Portfolio**

Enhance your ability to read and understand complex ideas in English, and to compose convincing written arguments yourself.

**Database Design and Implementation**

The module will introduce you to the key principles and stages involved in designing a database.

**Design, Manufacture and Materials**

Explore various methods, tools, manufacturing techniques and materials, and develop practical workshop skills.

**Digital Applications**

Develop your digital skillset, helping you use digital tools to support academic study, including using and citing digital sources.

**Digital Electronic Systems**

Learn about digital design methods and systems, and how they function alongside engineering principles.

**Digital Evidence**

Introducing you to the key tools and techniques used for investigating computer crime.

**Economics**

Gain an understanding of macro and micro economics, and explore current trends and issues in the field.

**Electrical and Electronic Engineering Principles 1**

Explore electronic component and circuit design, as well as the fundamental principles of electrical and electromagnetic signals.

**Electrical and Electronic Engineering Principles 2**

Gain a better understanding of magnetic and electromagnetic systems, as well as important skills required for electrical and electronic engineering.

**English for Academic Purposes**

Develop your English to the level you need for university study, and to really get involved in academic discussions.

**English for Academic Study 2**

Improve your English grammar and vocabulary in order to communicate in an academic environment.

**Financial Institutions and Markets**

You'll develop an understanding of financial systems and the role of commercial banking in a developed economy.

**Financial Reporting**

Discover how to interpret financial statements and explore the role of IT in processing financial data.

**Fluid Mechanics**

Explore the principles of fluid dynamics, including pressure, density, mass flow rates and Bernoulli's equation.

**Independent and Collaborative Study**

Work individually and in teams on an academic task, and practise applying your subject knowledge and study skills.

**Logic and Critical Thinking**

Explore the concepts, history and skills relating to logic and critical thinking, and how they apply in real-world contexts.

**Intermediate Mathematics**

Expand your knowledge of various mathematical concepts including algebra, geometry, problem-solving, trigonometry and vectors.

**Information Technology**

Discover the key concepts of computer science, including data representation and programming languages.

**Management Accounting**

Find out about the role of financial management in different organisations, and techniques for financial decision-making. Marketing in the

**Operational Context**

Expand your knowledge of how companies use marketing processes, and learn their effects on an organisation's performance.

**Mathematics**

Develop your mathematical skill set in areas such as algebra, decision maths, probabilities and statistics.

**Mathematics for Engineers 1**

Gain a better understanding of algebra, modelling techniques and many of the other mathematical methods that are needed in engineering.

**Mathematics for Engineers 2**

Expand your knowledge of calculus, differentiation, integration and differential equations, as well as mathematical methods of engineering.

**Mechanical Stress and Dynamics**

Explore stress and strain, shear force and bending, Newton's laws of motion and more.

**People, Culture and Society**

Learn about the history, theories and issues that relate to human culture and society around the world.

**Physics**

Gain an understanding of areas such as astrophysics, electromagnetism, mechanics and thermodynamics.

**Preparatory Mathematics**

Develop your numeracy skills, including algebra, geometry and graphs.

**Preparatory Statistics**

Build on your knowledge of using statistics, including the use of data to illustrate facts and support theories.

**Principles of Computing**

This module will introduce you to the fundamentals of computing, looking at both software and hardware, in computer systems.

**Programming**

Learn the basics of programming, engineering principles in the software industry, and how to use software systems to solve engineering problems.

**Programming in C/C++**

This module introduces you to the language of programming C++ used by professional programmers. Using theoretical concepts to analyse real-world practices.

**Quantitative Methods for Business**
